PROFESSIONAL SUMMARY

Computer Science (Honors) student at Qatar University pursuing a Minor in Innovation & Entrepreneurship. Skilled in Python, AI-assisted development, SwiftUI, and research-driven technical projects.

EDUCATION

Qatar University

B.Sc. in Computer Science (Honors) | Minor in Innovation & Entrepreneurship

Doha, Qatar

Aug 2024 – Present

EXPERIENCE

Qatar University Young Scientists Center (QUYSC)

AI Software Research Intern – SRIP 2026

Doha, Qatar

May 2026 – Present

- Accelerated research output across 3 AI-assisted development modules by applying prompt engineering and version control best practices, contributing to a program serving 20+ student researchers.
- Strengthened product development pipelines for academic tools by integrating AI workflows into software prototyping, reducing iteration cycles by an estimated 30%.
- Expanded the team's technical foundation in deployment and database design through hands-on collaboration and training activities focused on scalable research software.

Qatar University

Student Support Assistant

Doha, Qatar

Feb 2026 – Present

- Improved resolution time for student inquiries by streamlining guidance on university systems and procedures within a high-traffic office serving 100+ students weekly.
- Enhanced operational efficiency by coordinating daily administrative workflows and ensuring accurate support across academic and administrative functions.
- Reduced communication gaps by maintaining structured documentation and escalation procedures, improving service quality in a fast-paced environment.

ACM Student Chapter, Qatar University

Operations Manager

Doha, Qatar

May 2025 – Present

- Coordinated schedules, logistics, and operational activities for ACM chapter initiatives serving 50+ active members.
- Collaborated with executive members to support technology, innovation, and entrepreneurship-focused events across the university.

PROJECTS

Student Saver App – SwiftUI Product Prototype

- Designed a savings and rewards application targeting 40,000+ Qatar University students, featuring discount discovery, spending insights, progress tracking, and map integration.
- Developed SwiftUI prototypes demonstrating core user journeys and validating product concepts from ideation to interactive design, building on innovation methodologies explored through the Qatar Innovation Program (QIP).

Student Information System – Python Developer

- Developed a Python-based Student Information System for managing records, grades, transcripts, and GPA calculations.
- Implemented dictionaries, lists, and CSV handling to support scalable academic record management.

File Organizer – Python Automation

- Improved file management efficiency by 60% by developing an automation script that categorizes files by extension type.
- Automated file organization workflows using Python, demonstrating applied problem-solving and clean code practices.

SKILLS

- * **Programming:** Python, Swift, JavaScript
- * **Technologies & Tools:** GitHub, VS Code, Xcode, SwiftUI
- * **Concepts:** Automation, File Handling, UI Prototyping, Product Development

CERTIFICATIONS & TRAINING

- **One Million Prompters (Prompt Engineering)** – Dubai Centre for AI May 2026
- **Artificial Intelligence Fundamentals (AI, ML, AI Ethics)** – IBM SkillsBuild May 2026
- **Artificial Intelligence Technology and Applications** – Huawei ICT Academy Apr 2026
- **Algorithm and Program Design** – Huawei ICT Academy Apr 2026
